PREFACE

1. Income estimates at the district level have assumed a special significance keeping in view the setting-up of District Level Planning Committees by the State Government to formulate a long-term district perspective plan and to evolve a short-term strategy for planned development of the districts. Greater emphasis being laid down on empowering PRIs for strengthening local level planning has made District Income Estimates even more important.

2. State Income estimates measure the volume of all the goods and services produced in the economy during a given period of time. The composite estimates of income at the State level do not reveal whether the benefits of development have been evenly distributed among the districts or not. District Income estimates throw light on the regional development of the economy and its structural shift over the years. These estimates are useful to study the inter-sectoral and inter-district economic imbalances and help in removing such disparities. These estimates help in drawing up suitable planning programmes and in measuring the effects of their implementation. Thus, they may prove very useful for formulation, review and implementation of broad policy objectives.

3. This publication presents District Income estimates both at current and at constant prices for the years 2011-12 to 2013-14(P). A brief note on the methodology adopted to prepare these estimates, along with limitations of data and analysis etc. has also been given in this publication. District-wise major socio-economic indicators alongwith all district level data that have been used to bifurcate the State Domestic Product under different industries have been added to enhance the utility of the publication. A few charts have also been given at

suitable places to highlight the main trends. It is hoped that the information given in this publication will be useful to planners, policy-makers, research workers and others. Comments and suggestions for the improvement of the publication are welcome.

Acknowledgment is made of work done by the officers in drafting and preparation of this publication. A list of those associated with this work is inside of the title cover.

Chapter-1

INTRODUCTION

1.1 Estimates of State Domestic Product (SDP) commonly known as State Income estimates are considered among the most reliable indicators of economic development. These estimates measure the value of goods and services produced in the State during a given period of time without duplication and give a specific view of the overall picture of the economic situation in the State. However, this aggregate indicator does not reveal spatial variation in economic growth. For a comparative picture of the rate of economic growth in various parts of the State, district-wise estimates are required. Such estimates are also useful for district level planning.

1.2 Recognising the need of the District Income Estimates for district/regional level planning the 'Working Group on District Planning' under the Chairmanship of Shri C.H. Hanumantha Rao set up by the Planning Commission in September, 1982 has observed in its Report that the lack of data on District Income and its breakdown by sectors and blocks is yet another deficiency. The 'Income Originating' estimates will be useful indicator for District Planning in many ways. This Working Group recommended that District-wise estimation of 'Income Originating' should be attempted by all states.

1.3 In recent years more and more use of district income estimates is being made to study the regional imbalance within the State and structural composition of the economy in various districts. Identification of the backward districts or areas is also necessary so that appropriate development programme can be formulated to remove inter-district or regional disparities. In this context, district income estimates assume special significance.

1.4 In order to meet these requirements, this Organization started preparing District Income Estimates from 1970-71. At present the estimates are prepared for the year 2011-12 to 2013-14(P) at current & constant (2011-12) prices. The estimates at current prices reflects growth in output of goods and services including

the effect of change in prices, while the estimates at constant prices reveal the actual growth in the output removing the effects of change in prices.

1.5 In order to study the relative contribution and composition of different sectors of the economy at the district level, district income estimates alongwith state income estimates have been prepared for a number of years. These district-wise and sector-wise estimates of SDP have been prepared for the years 2011-12 to 2013-14(P) at current and at constant (2011-12) prices on the basis of the available data.

Concept and definition

1.6 The district income is defined as the sum total of the economic value of all goods and services produced within the district, irrespective of the fact whether a person is inside the district or out side own the income. The estimates of District Domestic Product (DDP) also termed as District Income is compiled in a similar manner to the one being followed in the case of State Domestic Product (SDP).i.e., 'Income originating' concept is used in working out DDP; although the estimates worked out on the basis of 'Income accruing' concept is relatively better one. Income accruing concept is followed in the preparation of National Income estimates at all India level.

GDDP/NDDP

1.7 Gross District Domestic Product (GDDP) represents the sum of economic value of all goods and services produced within the geographical boundary of the district after deducting the necessary inputs consumed in the process of production and Financial Intermediation Services Indirectly Measured (FISIM). From this Gross District Domestic Product, Consumption of Fixed Capital (CFC) is deducted to arrive at the Net District Domestic Product (NDDP) which is normally termed as District Income. The District income is divided by the mid year estimated population of the district that is in question to get the per capita income of that district.

Per Capita Income

1.8 Per Capita Income refers to annual income of each person of society within a specific geographical unit in a given period of time. It derives on dividing Net Domestic Product with population of that specific geographical unit. For the purpose, the estimates of per capita income are obtained by dividing the Net District Domestic Product (NDDP) at current/constant prices of the district by its projected mid-year population.

Financial Intermediation Services Indirectly Measured (FISIM)

1.9 The Banking Enterprises render services to their customers in the form of maintaining their accounts and providing them banking services. In return for these services, customers are charged nominal amount which is substantially smaller considering the expenses of the Banking enterprises, on the other hand, the banks provide loans and advances and returns on such transactions are much higher when compared to the payments made to the depositors. This net return accruing to banks is large enough to meet their expenses and to earn a profit. If financial enterprises are treated like any other productive enterprise, their income in the production account would only be limited to the charges made on customers which would mean that the banks would have a negative operating surplus and most receipts of banking and financial enterprises net of interest paid to depositors is defined as FISIM (income earned for services rendered) and is entered as a receipt item in the output of the financial enterprises. The output of the financial enterprises thus includes interest received, which was paid by the producing industries. As the interest paid by the industries is already accounted for in the Gross Value Added (GVA) of the respective industries, its inclusion in the GVA of Banking industry amounts to duplication. To avoid this duplication, FISIM is allocated to the user industries as an intermediate input. At present, the estimates of FISIM for all sectors of the economy are supplied by CSO after preparing the same at the national level and allocated to the States. State level FISIM is further allocated to the districts.

Consumption of Fixed Capital (CFC)

1.10 Consumption of Fixed Capital (CFC) also termed as 'Depreciation' is defined as that part of the gross product which is required to replace the fixed capital used up in the process of production during the period of account. This flow is based on the concept of the expected economic life of the individual assets and is designed to cover the expected loss in value terms due to obsolescence and the normal amount of accidental damage which is not made good by repair as well as normal wear and tear. It is estimated from the value of fixed capital assets and the information on the ages of various types of assets.

1.11 It is not possible to estimate the CFC unless the estimates of Gross Capital Formation (GCF) and Gross Capital Stocks (GCS) are prepared. At present, the estimates of CFC for all sectors of the economy are supplied by CSO after preparing the same at the national level and allocated to the States. State level CFC is further allocated to the districts.

Scope and Coverage

1.12 The scope and coverage of the district income estimates is the same as that of the state income estimates, Income originating concept has been adopted to prepare the estimates at the district level. In other words, it is taken to be the value of goods and services produced within the boundaries of the district, irrespective of the fact whether the income is owned by residents or non-residents of the district.

Limitations of Data

1.13 The district level estimates of income suffer from a number of limitations. These limitations relate to the methodology adopted and inadequacy of data at certain levels. It is, therefore, suggested that these estimates may be used with caution. The limitations are given below:-

- i. As is commonly known, the basic data required for preparation of district income estimates from different sectors is inadequate. As regards agriculture, live-stocks and local bodies, etc., most of the desired information is available at the district level but district - wise cost of all the input items in case of agriculture and live-stocks is not available is meagre, estimates have been prepared using suitable district-wise indicators.
- ii. In the sectors where income approach is followed, it is presumed that per head earning is the same in all the districts which may not truly reflect the actual position. District-wise income differentials have, therefore, been ignored in these estimates.
- iii. There is non-availability of data at district level particularly in respect of most of the construction activity, supra-regional sectors and other services sector.
- iv. Even with the above mentioned limitations, these estimates are helpful in exhibiting the pattern of sectoral distribution and trend of economic growth in the economy of the districts. These may not reflect the exact status of economic development. But they do present a comparative position of the districts.

Chapter-2

METHODOLOGY

The methodology for preparation of District income estimates is very much depends on availability of basic data at district level. The database at the District level is far from satisfaction for estimation of income at the district level. Nevertheless, the data in respect of Primary Sector is fairly sound, but appears to be very scanty in respect of remaining sectors. Therefore the district level data could be utilized to the extent of it's availability to compute the district income estimates adapting the state level methodology. In the case of non-commodity producing sectors, where the district wise basic data are not available, the state level estimates are allocated to the districts on the basis of suitable district wise indicators. Further, in some of the commodity producing sectors, though the district wise production and price data is available, the corresponding input data may not be available. In such cases, district wise production and price data is used and state level input data is utilized for preparation of district income estimates.

Industry wise details of methodology for preparation of District Domestic Product are given in the following paragraphs.

Agriculture- Gross value of output in agriculture sector is obtained as a product of district-wise production of agriculture crops including their by products and average wholesale prices prevalent in the selected marketing centres of district during the peak marketing period. The state level estimates (SDP) of this sector are allocated to the districts on the basis of percentage of GVO of agriculture sector.

Livestock- The gross value of output is obtained as a product of district-wise strength and production of different livestock categories and their respective prices collected from selected centres in each district. The input cost worked out at the State level is allocated to the districts according to the proportionate gross value of output from this sector in each district.

Forestry and Logging- The state level estimates of SDP from this sector are allocated to the districts on the basis of area under forests. For the Firewood estimates the district-wise rural population is applied.

Fisheries-The SDP of this sector is allocated to districts in ratio of the percentage of district- wise receipts from fisheries. This information is provided by Fisheries department which is contained in Statistical Abstract of Punjab.

Mining and Quarrying- The estimates of SDP from this sector are based on district-wise production and value of minerals.

Manufacturing- The state level estimates of SDP from this sector are allocated to the districts on the basis of ratio of No. of industrial workers engaged in manufacturing industries in the districts as available in Economic Census 2012.

Construction-The estimates of SDP from various sub-sectors under this sector are distributed among different districts on the basis of work force engaged in related construction activity from Economic census 2012.

Electricity, Gas and Water Supply- The State level estimates of income from electricity sub-sector are distributed among various districts according to total consumption of power in each district. In case of Gas, Water Supply and Utility Services estimates are prepared on the basis of number of workers engaged in the respective services at the district level as per Economic Census 2012.

Transport, Storage and Communication- The district-wise estimates of SDP of this sector are prepared separately for railways, communication and storage sub-sectors by allocating the State level estimates on the basis of working force engaged in this sector as per Economic Census 2012. In case of Transport by other means, district-wise number of motor vehicles is used to allocate state level estimates to districts.

Trade, Hotels and Restaurants: The estimates of SDP from trade, hotels and restaurants sub-sectors are distributed among districts with the help of working force engaged in relevant activities in districts from Economic Census 2012.

Banking and Insurance-The State level estimates of income from this sector are allocated to the districts on the basis of number of Banking Offices in each district of the state. This information is provided by local office of Reserve Bank of India which is available in Statistical Abstract of State.

Real Estate, Ownership of Dwellings and Business Services: The estimates of SDP from Real Estate, Ownership of Dwellings and Business Services are bifurcated among districts on the basis of district-wise number of workers engaged in these services. The number of workers engaged in these services is taken from Economic Census 2012.

Public Administration: To prepare district-wise income estimates in respect of Central Govt., State Govt. and Autonomous Institutions and Local Bodies, the SDP of these sub-sectors is divided among districts in the ratio of percentage of number of State Govt. employees in the districts. This information is provided by Demography section of E.S.O. Punjab and is available in Statistical Abstract of State.

Other Services- The estimates of SDP from Other Services sub-sectors are distributed among districts with the help of working force engaged in relevant activities in districts from Economic Census 2012.

Chapter -3

ANALYSIS OF DISTRICT INCOME

3.1 The main aim of this publication is to focus attention on the behaviour pattern of the economy at the district level. There has been shift in the structural composition of the State's economy during the period 2011-12 to 2013-14, but this has not been equally or evenly distributed among different districts of the State. The quantum of per capita income and pace of economic growth of different districts are other concerns which are needed to be analysed to highlight the level of economic development across districts. These issues are analysed as under:

Size of the Income

3.2 The economic position and level of development in all 22 districts of Punjab State is not the same. District-wise estimates of Net District Domestic Product (NDDP) at current prices for the year 2011-12 to 2013-14 are given in table- 20. It is evident from table that total State Income is not evenly distributed among different districts of the State. Some of the districts are more economically developed than the other though some of the variation could also be ascribed to their area differences. The contribution towards State Income by the three districts Amritsar, Ludhiana and Jalandhar accounted for more than 30.76 percent of the total income during the year 2011-12 though these districts together had only 17.96 percent of the total area of the State. Ludhiana was the largest contributor to the State Income; its contribution being 15.04 percent followed by Jalandhar 8.49 percent and Amritsar 7.23 per cent. Moreover their contribution towards state Income has slightly increased during the year 2012-13 to 31.26 with Ludhiana the largest contributor to State Income is 15.19 percent while Jalandhar and Amritsar contributing to 8.63 and 7.44 percent respectively. On the contrary, the share in State Income during 2011-12 of three districts namely - Muktsar, Bathinda and Ferozepur was only 10.91 percent while these districts collectively have 22.44 percent of total area of State. The contribution of four districts during 2011-12 namely-Fatehgarh Sahib, Moga,

Kapurthala and Gurdaspur towards NSDP contributed 13.98 percent of NSDP and occupied 17.06 percent of total area of State. District wise percentage share of area and Net State Domestic Product is shown in the following table:-

District/Year wise Net Domestic Product and its percentage at Current Prices

SN	District	%age share in Area	District wise %age share in NSDP		
			2011-12	2012-13	2013-14
1	2	3	4	5	6
1	Gurdaspur	7.08	4.53	4.36	4.48
2	Pathankot*	-	2.15	2.13	2.02
3	Amritsar	5.25	7.23	7.44	7.51
4	Taran Tarn	4.86	3.12	3.17	3.20
5	Kapurthala	3.24	3.14	3.14	3.21
6	Jalandhar	5.23	8.49	8.63	8.51
7	SBS Nagar	2.52	2.62	2.61	2.62
8	Hoshiarpur	6.68	6.63	6.44	6.38
9	Roopnagar	2.72	2.93	2.85	3.00
10	SAS Nagar	2.17	4.26	4.33	4.44
11	Ludhiana	7.48	15.04	15.19	15.19
12	Ferozepur	10.53	3.39	3.55	3.16
13	Fazilka*	-	2.85	2.73	3.14
14	Faridkot	2.92	2.08	2.04	2.05
15	Muktsar	5.19	2.90	2.93	2.73
16	Moga	4.40	3.83	3.84	3.79
17	Bathinda	6.72	4.62	4.57	4.54
18	Mansa	4.31	2.36	2.26	2.25
19	Sangrur	7.17	6.31	6.36	6.25
20	Barnala	2.80	2.22	2.20	2.13
21	Patiala	6.39	6.83	6.70	6.85
22	Fatehgarh Sahib	2.34	2.48	2.52	2.52
	Punjab	100.00	100.00	100.00	100.00

*Area of district Pathankot and Fazilka are included in Gurdaspur and Ferozepur respectively.

Position of year-wise Contribution of Districts

3.3 Year-wise position of different districts w.r.t. their contribution in state NSDP at current prices during the year 2011-12 to 2013-14 is also given in table- 20. It shows that Ludhiana district has persisted its first position during the year 2011-12 to 2013-14. Moreover its contribution had slightly increased from 15.04 in 2011-12 to 15.19 percent in 2012-13 and remained at 15.19 percent in 2013-14. The second position was occupied by district Jalandhar during the year 2011-12 with its 8.49 percent contribution and increased to 8.63 percent in the year 2012-13 and 8.51 percent in 2013-14. The third position was persisted by Amritsar district during the year 2011-12 to 2013-14, the contribution of which was varied from 7.23, 7.44 and 7.51 percent respectively.

Sectoral Composition of District Income

3.4 The structural composition of the economy at the district level is a subject of considerable importance for planning purposes. The district-wise and sector-wise distribution of estimates of NDDP at current prices for the year 2011-12 to 2013-14 is given in table- 21. In order to examine the imbalances in the development of the districts, different sectors have been grouped into three broad sectors, namely - primary, secondary and Tertiary. The primary sector includes agriculture, livestock, forestry & logging, fishing and mining & quarrying and the secondary sector consists of manufacturing, construction and electricity, gas and water supply. Tertiary sector comprises transport, storage and communication, trade, hotels and restaurants; banking and insurance, real estate, ownership of dwellings and business services, public administration and other services.

3.5 The data in table- 22 shows that the structural composition of NDDP at state level has changed marginally during the year 2011-12 to 2013-14 as contribution of primary sector has decreased from 33 to 32 percent in 2012-13 as compared to 2011-12 and 32 to 31 percent in 2013-14 where as Tertiary sector has increased from 44 to 45 percent in 2011-12 to 2012-13 and 45 to 47 percent in 2013-14. On the other hand secondary sector has remained at 23 percent in 2011-12 and 2012-13 where as it has declined to 22 percent in 2013-14. In Ludhiana

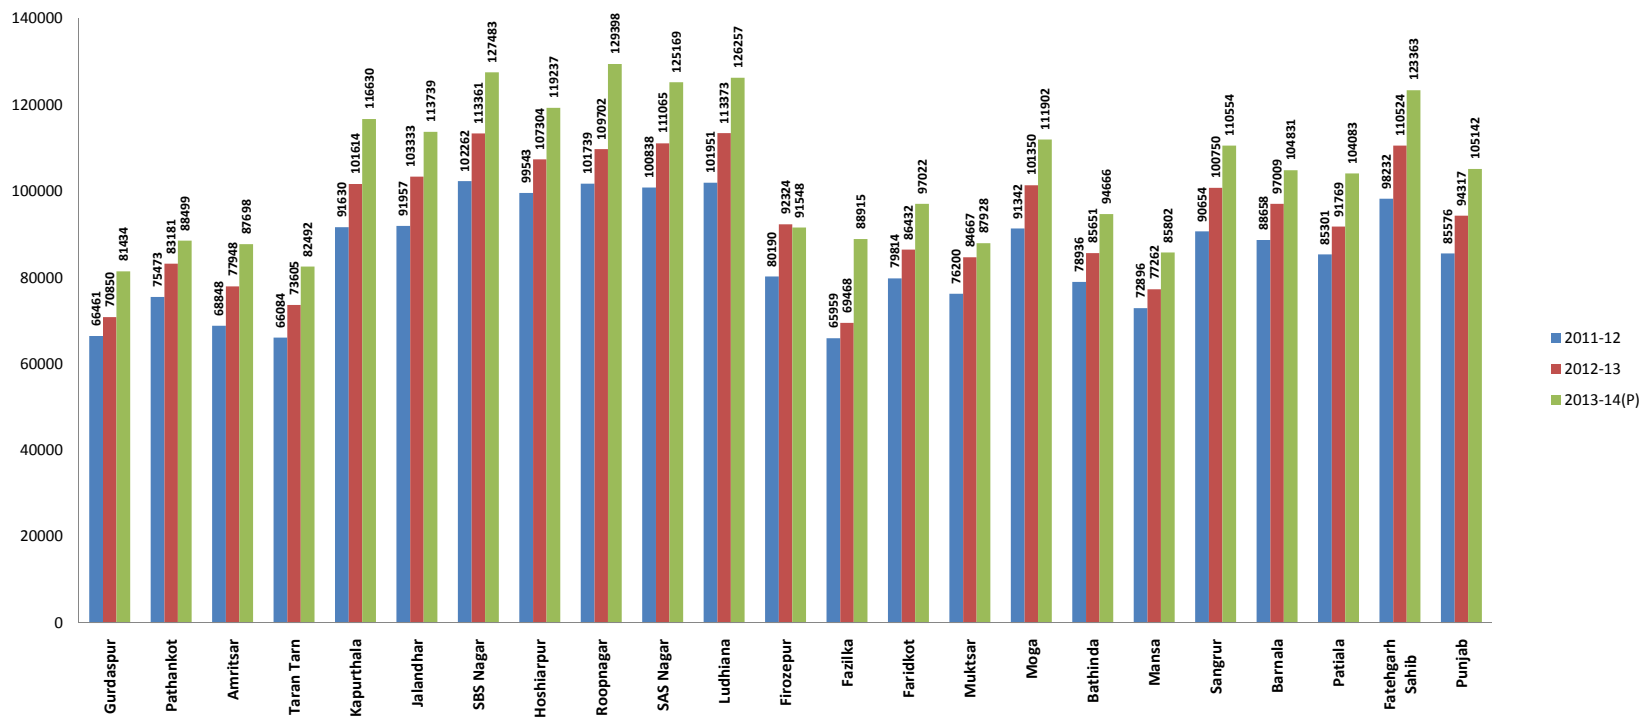

district the proportion of primary sector, which was 18 percent in 2011-12 has decreased to 17 percent in 2012-13 and secondary sector has also decreased from 35 to 34 percent. On contrary, in case of less developed district namely- Firozpur, Muktsar, Bathinda and Mansa, the contribution of primary sector in NDDP remained static or increased during this period. The development of secondary as well as tertiary sector should be given greater emphasis in the districts to make these districts economically developed.

Per Capita Income

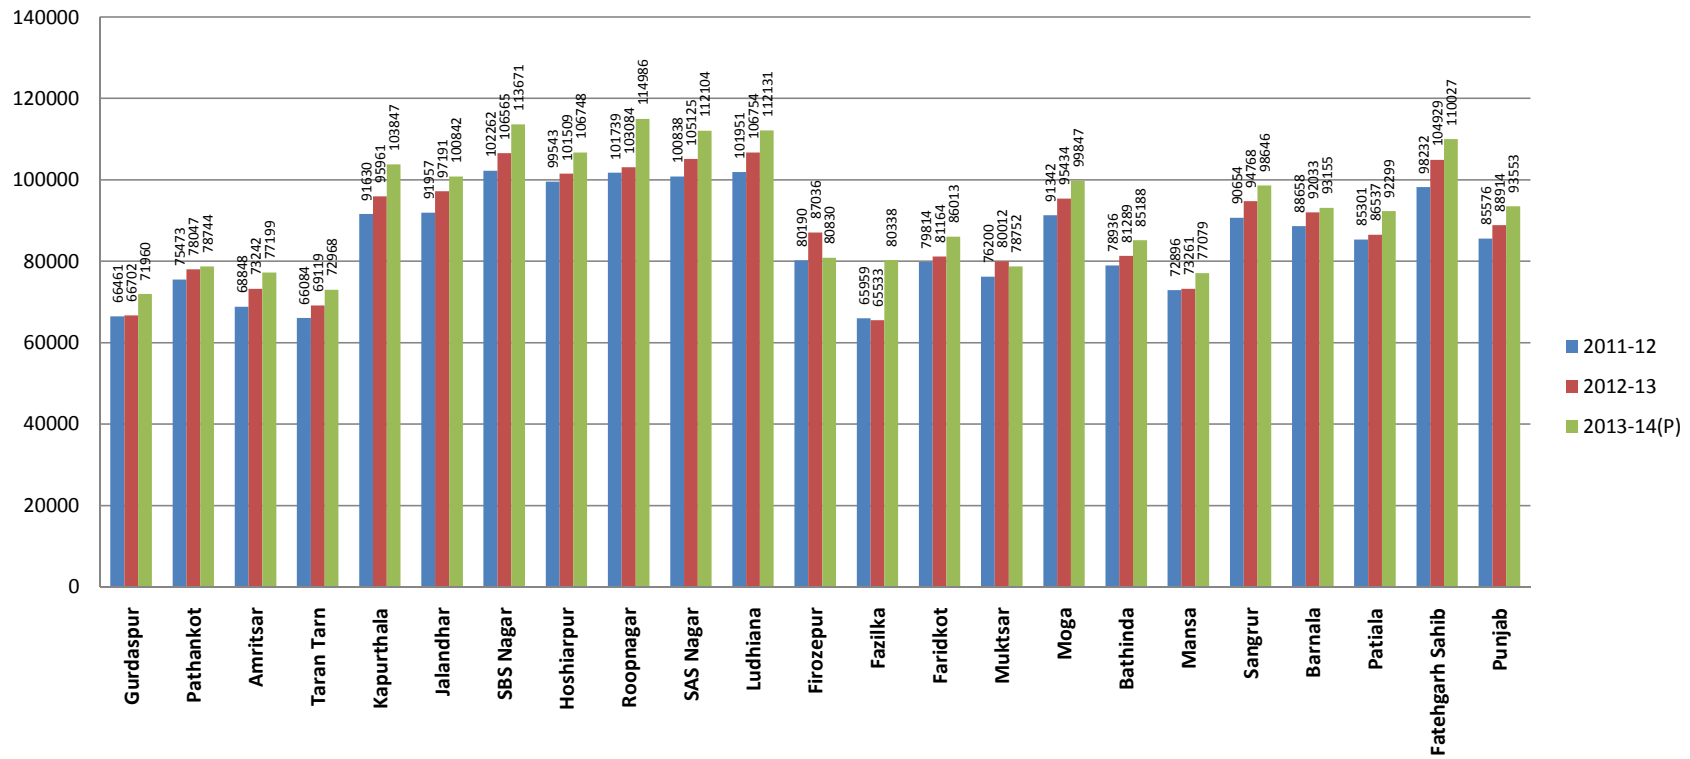

3.6 Per capita income (PCI) is one of the vital indicators of economic development but it does not throw light on the specific prosperity or backwardness of any district. The estimates of district-wise PCI at current prices for the year 2011-12 to 2013-14 are given in table-1. These estimates are obtained by dividing the NDDP at current prices of the district by its projected mid-year population. It is apparent from this table that SBS Nagar district has emerged to occupy the first place among the districts in respect of PCI for the year 2011-12. Whereas the position of Fazilka district in this respect was lowest during this period. In the year 2012-13 Gurdaspur district had occupied 2nd last rank. During the year 2012-13 and 2013-14 SBS Nagar district was at second rank in respect of PCI while from the year 2012-13 and 2013-14 first position was occupied by District Ludhiana. Moga District remained at 9th position from 2011-12 to 2013-14.

3.7 During the year 2011-12, SBSNagar, Ludhiana, Moga, FatehgarhSahib, Jalandhar, Kapurthala, Sangrur, Roopnagar, SAS Nagar, Hoshiarpur and Barnala had the higher PCI than State average i.e. Rs. 85576 while the remaining district had lower PCI than state average. During the year 2012-13 SBS Nagar, Moga, Ludhiana, Fatehgarh Sahib, Kapurthala, Jalandhar, Sangrur, SAS Nagar, Roopnagar, Hoshiarpur and Barnala had higher PCI above state average i.e. 94317 while remaining 10 districts were below the state average. During the year 2013-14 SBS Nagar, Moga, Ludhiana, Fatehgarh Sahib, Kapurthala, Jalandhar, Sangrur, SAS Nagar, Roopnagar, Hoshiarpur were found having the PCI above state average i.e. Rs. 105142 .

**District-wise Per Capita NDDP At Current Prices
(2011-12 to 2013-14) (Rupees)**

District-wise Per Capita NDDP at Constant (2011-12)Prices (2011-12 to 2013-14)(Rupees)

Chapter-4

DISTRICT-WISE ANALYSIS

4.1 District-wise analysis of NDDP, per capita income, economic growth rate and sectoral composition of NDDP to know the level of economic development for each district is made as under:

Gurdaspur

4.2 This district occupies 7.08 percent (4th rank*) area of state and 5.85 percent (6th rank) of total population of state. The NDDP at current prices of this district during the year 2013-14(P) was Rs. 13526.21 crore which accounted for 4.48 percent of total state's NSDP during this year. The per capita income at current prices during the year 2013-14 of this district was Rs. 81,434(22nd rank).

Pathankot

4.3 This district occupies 2.44 percent (18th rank) of total population of the State. The NDDP at current prices of this district during the year 2013-14(P) was Rs. 6106.41crore which accounted for 2.02 percent (22nd rank) of total state's NSDP during this year. The per capita income at current prices during the year 2013-14 of this district was Rs. 88,499(17th rank).

Amritsar

4.4 Amritsar district has 5.25 percent (8th rank) of total area and 8.98 percent (2nd rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 22661.04 crore which accounted for 7.51 percent (3rd rank) of total NSDP of State. District's per capita income at current prices during this year was Rs. 87,698(19th rank).

**Rank among all districts of state (Table-1).*

Tarn Taran

4.5 This district occupies 4.86 percent (11th rank) area of state and 4.03 percent (9th rank) of total population of state. The NDDP at current prices of this district during the year 2013-14(P) was Rs.9659.76 crore which accounted for 3.20 percent (12th rank) of total state's NSDP during this year. The per capita income at current prices during the year 2013-14 of this district was Rs. 82,492 which accounted for 21th position in state.

Kapurthala

4.6 The district has 3.24 percent (14th rank) of total area of state and its share in total population of state is 2.94 percent (15th rank). The NDDP at current prices of this district during the year 2013-14(P) was Rs.9691.99 crore which accounted for 3.21 percent (11th rank) of total NSDP of the state. The per capita income of this district at current prices during the year 2013-14 was Rs. 116,630 which was at the 7th rank among all districts.

Jalandhar

4.7 This district has 5.23 percent (9th rank) of total area and 7.91 percent (3rd rank) of total population of the State. The total NDDP of district at current prices for the year 2013-14(P) was Rs. 25671.00 crore which was 8.51 percent (2nd rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 113,739 (8th rank).

SBS Nagar

4.8 This district has 2.52 percent (18th rank) of total area and 2.21 percent (20th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14 was Rs. 7891.22 crore which was 2.62 percent (17th rank) of total NSDP of State. District's per capita income at current prices during the year

2013-14(P) was Rs. 127,483. This district had occupied 1st position w.r.t. per capita income in the year 2011-12 and 2nd position in each year during 2012-13 and 2013-14.

Hoshiarpur

4.9 This district has 6.68 percent (6th rank) of total area and 5.72 percent (7th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 19256.81 crore which was 6.38 percent (5th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 119,237 (6th rank).

Rupnagar

4.10 This district has 2.72 percent (17th rank) of total area and 2.47 percent (17th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 9057.84 crore which was 3.00 percent (15th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 129,398 (1st rank).

SAS Nagar

4.11 This district has 2.17 percent (20th rank) of total area and 3.58 percent (13th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 13405.57 crore which was 4.44 percent (9th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 125,169 (4th rank).

Ludhiana

4.12 This district has 7.48 percent (2nd rank) of total area and 12.61 percent (1st rank) of total population of the State. The total NDDP of this district at current prices for the year 2013-14(P) was Rs. 45818.65 crore which was 15.19 percent (1st rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 126,257 (3rd rank).

Ferozepur

4.13 This district has 10.53 percent (1st rank) of total area and 3.61 percent (11th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 9539.26 crore which was 3.16 percent (13th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 91,548 (15th rank).

Fazilka

4.14 This district occupies 3.70 percent (10th rank) of total population of the State. The NDDP at current prices of this district during the year 2013-14(P) was Rs. 9478.36 crore which accounted for 3.14 percent (14th rank) of total state's NSDP during this year. The per capita income at current prices during the year 2013-14 of this district was Rs. 88,915(16th rank).

Faridkot

4.15 This district has 2.92 percent (15th rank) of total area and 2.23 percent (19th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 6170.59 crore which was 2.03 percent (21st rank)

of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 97022 (13th rank).

Muktsar

4.16 This district has 5.19 percent (10th rank) of total area and 3.25 percent (14th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 8238.81 crore which was 2.73 percent (16th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 87,928 (18th rank).

Moga

4.17 This district has 4.40 percent (12th rank) of total area and 3.59 percent (12th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 11447.60 crore which was 3.79 percent (10th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 111,902 (9th rank).

Bathinda

4.18 This district has 6.72 percent (5th rank) of total area and 5.00 percent (8th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 13698.15 crore which was 4.54 percent (7th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 94,666 (14th rank).

Mansa

4.19 The district has the 4.31 percent (13th rank) of total area of state and its share in total population of state is 2.77 percent (16th rank). The NDDP at current prices of this district during the year 2013-14(P) was Rs. 6795.51 crore which

accounted for 2.25 percent (19th rank) of total NSDP of the state. The per capita income of this district at current prices during the year 2013-14 was Rs. 85,802 which was at the 20th rank among all districts.

Sangrur

4.20 This district has 7.17 percent (3rd rank) of total area and 5.97 percent (5th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 18849.52 crore which was 6.25 percent (6th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 110,554 (10th rank).

Barnala

4.21 This district has 2.80 percent (16th rank) area of state and 2.15 percent (22th rank) of total population of state. The NDDP at current prices of this district during the year 2013-14(P) was Rs. 6436.63 crore which accounted for 2.13 percent (20th rank) of total state's NSDP of the State. District's per capita income at current prices during the year 2013-14 was Rs. 104,831 (11th rank).

Patiala

4.22 This district has 6.39 percent (7th rank) of total area and 6.83 percent (4th rank) of total population of the State. The total NDDP of district at current prices for the year 2013-14(P) was Rs. 20660.51 crore which was 6.85 percent (4th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 104,083 (12th rank).

Fatehgarh Sahib

4.23 This district has 2.34 percent (19th rank) of total area and 2.16 percent (21th rank) of total population of the State. The total NDDP of District at current prices for the year 2013-14(P) was Rs. 7611.53 crore which was 2.52 percent (18th rank) of total NSDP of State. District's per capita income at current prices during the year 2013-14 was Rs. 123,363 (5th rank).
